Education

Sauder School of Business at The University of British Columbia, Vancouver, Canada (Transfer) Exp. Graduation May 2018
Bachelor of Commerce in Business and Computer Science w/ 3.2 GPA

Related Coursework: Quantitative Analysis, Management of Information Systems, Information System Technology Development, Models of Computation, Software Construction, Software Engineering, Basic Algorithms and Data Structures, Intermediate Algorithms and Data Structures, Relational Databases, Operating Systems

Boston College, College Arts and Sciences, Chestnut Hill, USA
Bachelor of Science in Biology w/ 3.8 GPA

September 2013 - May 2014

Technical Skills

Programming Languages and Frameworks

Working Knowledge: Java, Javascript, Typescript, JUnit, Mocha

Familiar: C, C++, Bootstrap, JQuery

Learning: MySQL, MongoDB, R, HTML, CSS, REACT

Software and Platforms

Working Knowledge: CLion, IntelliJ, Webstorm, Atom, Photoshop

Familiar: UNIX Shell, NodeJS, Git, Webpack, Autodesk Maya 3D Modelling

Projects

NFL Stats Machine (In-Progress)

September 2016 - Present

Sole developer of a full-stack web-application designed to allow a user to determine whether a statistical relationship exists between variables for NFL player data.

- Features: regression graph, context specific data analysis for hypothetical statistical relationship.
- Example of use: computes a linear regression on x and y parameters, which are selected by the user; contextual information is output.
- Currently developing statistical function in R.
- Parameters are NFL player statistical data, which are stored in an open-source Python module that parses data from the NFL.com JSON feed.

Technologies used: REACT, NodeJS, RESTful API's, Typescript, R

UniTracker (In-Progress)

December 2016 - Present

A web-application that allows users to track their packages in a company-agnostic form.

- Features: outputs tracking information for a user's package.
- Example of use: user inputs tracking number, the server validates the format, queries the matching company's API, and outputs the information returned using REST endpoints.
- Currently refactoring code into a strategy design-pattern in order to improve extensibility in the future.

Technologies used: Bootstrap, JQuery, NodeJS, RESTful API's, Typescript, various company-specific API's.

Experience

Direct Liquidation: Burnaby, BC

July 2015 - January 2016

Direct Liquidation is a liquidation warehouse that specializes in redistribution of merchandise that had been acquired from distressed locations. In addition to these services, the company also offers auctioneer assistance throughout Canada.

Marketing and IT Officer
